

# FALCON

## *24 Series and 25 Series* *Touch Bar Exit Device*

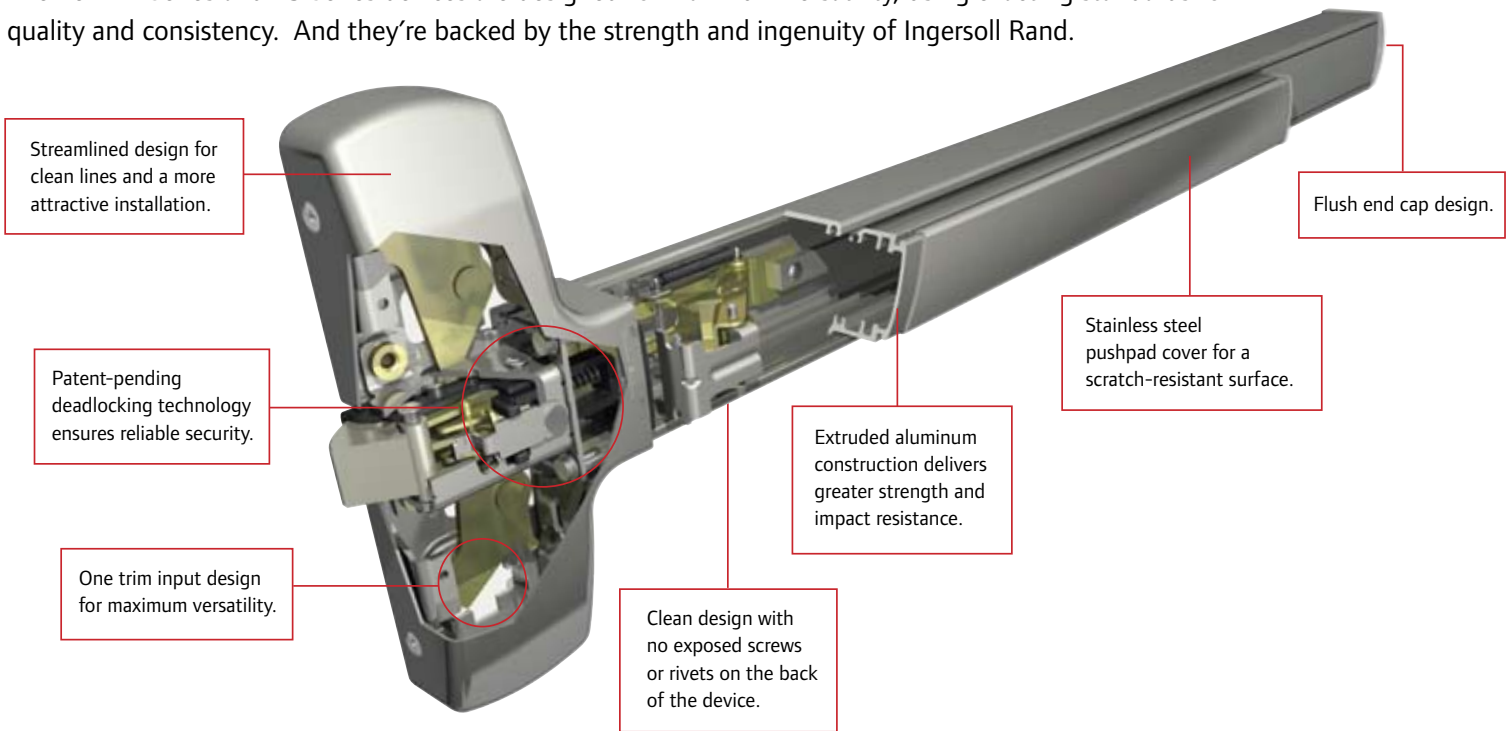

**You demanded a perfectly simple, tougher than nails, costs less than you think, fits anywhere exit device.**

The 24 Series and 25 Series give you a full range of functions, a choice of narrow stile or standard heads and performance that exceeds ANSI cycle testing requirements. Put it all together and you can be sure you've got an exit device that's built to last.

# FALCON

## You demanded a tougher exit device.

The new 24 Series and 25 Series devices are designed for maximum versatility, using exacting standards for quality and consistency. And they're backed by the strength and ingenuity of Ingersoll Rand.

## You asked for more application versatility, more performance and less inventory.

- Fewer SKUs means less inventory to stock and lower inventory costs for distribution partners
- Simple to order and price
- Easier selection and greater specification flexibility
- Meet or exceed ANSI/BHMA Grade 1 testing standards
- Extruded aluminum body for tough performance in a range of applications
- Standard features include scratch-resistant surfaces and deadlocking built into the device
