

## Falcon Locks adds the T291 Hospital / Grade School Privacy Function to the T cylindrical lock series

Brand: Falcon

Description: Falcon Locks has reintroduced the T291 function to its offering on the versatile and robust T series cylindrical locks. The T291 provides restroom privacy with push button and an outside emergency turn release. It is available on the popular Dane, Avalon and Quantum solid, pressure-cast zinc levers in five finishes.

**T291**

### **Privacy Hospital Lock**

Latch bolt by levers. Outside lever locked by push button in inside lever. Rotating inside lever, closing door, or turning emergency release turn button on outside, release push button. Inside is always free for egress.

The Falcon Grade 1 T series has the ability to adapt to multiple applications, formats and competitive offerings. The updated stainless steel compression springs and a machined solid steel spindle design make the T series an excellent choice.

The T291 function fits well in hospital and healthcare restrooms as well as lower elementary grade classroom restrooms.

The T291 function list price is the same as the T301 non-keyed privacy function.
